

Iron Statue

Play this card in front of you.

You can discard 3 Iron to win the game.

When this card is played, force all players (including you) to reveal their hands and shuffle all copies of iron back into the deck. Also shuffle the discard pile back into their respective decks. You can use this effect again on your turn by paying \$5.

RULES continued

If a deck is empty a player may no longer choose to mine there.

When all decks except IV are empty: Shuffle the discard pile back into their respectful decks.

When over the Cargo Limit, you may choose which card to discard

Take turns starting with the starting player and proceeding clockwise

This game plays 2-4 players. Paperclips not included. You will need 43 paperclips (at most) to play this game. I guess you could probably use other small objects, but you run the risk of bumping the table and messing up your game.
